PROFESSIONAL SUMMARY

Results-driven Computer Science graduate with 6 months of professional experience as an AI Engineer. Skilled in building full-stack web applications, AI-powered tools, and cross-platform mobile apps. Proficient in Python, JavaScript, TypeScript, React, Next.js, and FastAPI. Strong foundation in software development, machine learning, and REST API integration with a proven ability to deliver end-to-end solutions.

TECHNICAL SKILLS

Programming Languages
Python, JavaScript, TypeScript, Java, C/C++, Dart

Frontend Development
React.js, Next.js, HTML5, CSS3, Bootstrap

Backend & Databases
FastAPI, Node.js, Firebase, MySQL, Firestore

AI & Machine Learning
LLMs, Multi-Agent Systems, NLP, Computer Vision

Tools & Platforms
Git, GitHub, Android Studio, Flutter, Capacitor, REST APIs

CERTIFICATIONS

- Google: Connect and Protect: Networks (Coursera)
- Google: Foundation of Cybersecurity (Coursera)
- Web Development Training (Internshala)
- Object-Oriented Systems Using Java, UML, and Patterns (NPTEL)
- Joy of Learning Python (NPTEL)

EDUCATION

B.E., Computer Science and Engineering | CGPA: 7.98 — 2021 - 2025
NMAM Institute of Technology, Nitte

12th (C.B.S.E) | PCMCs: 81.20% — 2019 - 2021
HMR International School, Bengaluru

10th (C.B.S.E) | Percentage: 83.16% — 2019
SJR Public School, Bengaluru

WORK EXPERIENCE

Colligence Research — OCT 2025 - MAR 2026
AI Engineer

- Developed Circle — an in-house team collaboration app with AI-powered chatbot, real-time video calling, and screen sharing for seamless internal communication.
- Built Foundry — an AI-enabled ERP web application for managing inventory, accounting, invoicing, and resource planning.
- Integrated REST APIs and large language models (LLMs) into web-based AI tools using Python and FastAPI.

Center for Development of Telematics (CDot - PSU) — JAN 2025 - APR 2025
Software Developer Intern

- Developed an internship registration web application using JSP, JavaScript, CSS, and MySQL.
- Implemented user authentication, login, and session management for applicant access.
- Designed and optimized MySQL database schema for storing applicant data.

Dlithe — JAN 2025 - APR 2025
Front End Developer Intern

- Built responsive web interfaces using React.js, HTML5, CSS3, and JavaScript.
- Ensured cross-browser compatibility and mobile responsiveness across projects.

Internshala — NOV 2023 - JAN 2024
Front End Developer Intern

- Completed front-end development training covering HTML, CSS, JavaScript, and responsive web design.
- Built capstone projects using DOM manipulation and UI/UX design principles.

PROJECTS

Grok Notepad | HTML, JavaScript, AI Agent

- Built an AI-powered notebook featuring Groku — an intelligent AI agent that can answer any question.
- Integrated Word document editing, Excel spreadsheet, and PowerPoint presentation tools in a single workspace.

Bhoomitayi - Real Estate Platform | Next.js, TypeScript, Firebase, Capacitor

- Built a full-stack real estate platform acting as a middleman connecting property sellers and buyers.
- Implemented property listings, search, filtering, and transaction management with Firebase and Firestore.

GST Invoice Calculator | React, Firebase, Capacitor, Vite, Tailwind CSS

- Developed a GST invoice calculator with automated tax computation and PDF generation.
- Integrated Firebase for data storage and user invoice history. Deployed as Android app via Capacitor.

Music App | HTML, CSS, JavaScript, Android

- Developed a music streaming and download application with audio playback controls.
- Built Android APK releases for mobile distribution via GitHub Releases.
